PUBLIC HEALTH FUNDING  Strong investments in public health allow a state to carry out programs that improve health. Mississippi receives $114 per person total from the Centers for Disease Control and Prevention (CDC) and the Health Resources Services Administration (HRSA) in public health funding. In 2021 the Prevention and Public Health Fund awarded Mississippi over $4.14 million in grants for community and clinical prevention efforts and improvements to public health infrastructure.

ACCESS TO CARE  11.9 percent of people in Mississippi do not have health insurance coverage, well above the national uninsured rate of 8.6 percent. The number of practicing health care providers is also an important measure of health care availability. Mississippi has 259.0 active primary care providers per 100,000 people, ranking 34th in the nation.

Notable Health Measures

- Physical inactivity  30.9 percent of adults in Mississippi report doing no physical activity in the past 30 days, ranking the state highest in the nation for physical inactivity.

- Obesity  Mississippi has the highest obesity rate in the nation with 39.1 percent of adults obese. Obesity contributes to poor general health and is a leading factor in preventable diseases.

- High school graduation  85.0 percent students in Mississippi graduate from high school, ranking 29th in the nation. This is of public health concern as there is a strong connection between education and health. People with higher levels of education are more likely to adopt healthy behaviors.

The Challenges Ahead

- Tobacco use  19.6 percent of adults smoke cigarettes in Mississippi, ranking the state 5th highest in the nation.

- Teen birth rates  Mississippi has the highest rate of teen births, with 27.9 births per 1,000 females age 15-19.

- Low birthweight  11.8 percent of live births in Mississippi are low birthweight, the highest rate in the nation. Low birthweight is associated with short- and long-term complications and an increased risk of infant mortality.
