**PUBLIC HEALTH FUNDING**  Strong investments in public health allow a state to carry out programs that improve health. Tennessee receives $99 total per person from the Centers for Disease Control and Prevention (CDC) and the Health Resources Services Administration (HRSA) in public health funding. The Prevention and Public Health Fund awarded the state $13.72 million in grants for community and clinical prevention efforts and improvements to public health infrastructure in fiscal year 2018.

**ACCESS TO CARE**  9.8 percent of people in Tennessee do not have health insurance coverage, which is above the national uninsured rate of 8.8 percent. The number of practicing primary care physicians is also an important measure of health care availability. Tennessee has 139.1 active primary care physicians per 100,000 people. Nationally, there are 159.6 practicing primary care physicians per 100,000 people.

**Notable Health Measures**

- **Drug deaths**  Tennessee reported 24.3 deaths due to drug injury per 100,000 people in 2019. This is above the national average of 19.2 deaths per 100,000 people and makes Tennessee the 13th highest in the nation for drug deaths.

- **High school graduation**  89.8 percent of students graduate from high school in Tennessee. This is the 3rd highest rate in the nation. This is a notable measure as there is a strong connection between education and health. People with higher levels of education are more likely to adopt healthy behaviors.

**The Challenges Ahead**

- **Tobacco use**  24.2 percent of adults in Tennessee smoke cigarettes, ranking the state 4th highest in the nation. Each year, 11,400 people die from smoking-related illnesses in Tennessee and $2.7 billion is spent on health care costs due to smoking.

- **Violent crime**  The state has the 3rd highest violent crime rate in the nation with 624 offenses per 100,000 people. Violent crimes may cause injuries, disability and early death. Additionally, violent crimes may cause long-term stress for families and communities, and interfere with leading a healthy lifestyle. However, violent crime can be prevented. Numerous programs and practices have shown that by addressing root causes it is possible to prevent violence.
