

April 4, 2016

The Honorable Robert Aderholt
 Chairman
 Subcommittee on Agriculture, Rural Development,
 Food and Drug Administration, and Related
 Agencies
 Committee on Appropriations
 United States House of Representatives
 Washington, D.C. 20515

The Honorable Sam Farr
 Ranking Member
 Subcommittee on Agriculture, Rural Development,
 Food and Drug Administration, and Related
 Agencies
 Committee on Appropriations
 United States House of Representatives
 Washington, D.C. 20515

Dear Chairman Aderholt and Ranking Member Farr:

As your Subcommittee moves forward with the FY 2017 Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations bill, we urge you to approve the authorized level of user fees for the Food and Drug Administration's (FDA) oversight of tobacco products and to oppose any effort to limit the authority that Congress granted the FDA under the Family Smoking Prevention and Tobacco Control Act (TCA).

Prior to 2009, tobacco products were virtually unregulated even though they were known to be highly addictive and dangerous to health. Congress, on a bipartisan basis, recognized that tobacco products should be overseen by an agency with expertise in assessing health risks and experience promulgating science-based regulation. The TCA gave the Center for Tobacco Products at FDA the authority to oversee the manufacture, marketing, distribution and sale of tobacco products in a manner appropriate for the protection of public health.

We appreciate that every FDA appropriations bill approved by Congress since the enactment of the TCA has contained the full authorized amount of user fees. This year, we urge your Subcommittee to approve the \$635 million in user fees that the TCA authorizes FDA to collect and spend for tobacco-related activities for FY 2017.

We also urge that the Subcommittee not restrict any of FDA's authority under the TCA, including its authority to oversee all tobacco products. Last year, a policy rider was included in the House Agriculture- FDA Appropriations bill that would have changed the so-called "grandfather" date for e-cigarettes, cigars and other currently unregulated products that are now on the market. This change would have exempted these products from an important review requirement in the TCA and significantly weakened FDA's ability to take prompt action to protect children from the thousands of fruit and candy flavored e-cigarettes and little cigars that have flooded the market in recent years. We appreciate that the final FY 2016 Consolidated Appropriations Act did not include this harmful language and urge that the Subcommittee not include this rider or any other language that would restrict FDA's authority to oversee all tobacco products in the FY 2017 Agriculture- FDA Appropriations bill.

Tobacco use continues to be the leading preventable cause of death in the United States and is responsible for more than \$170 billion in health care costs every year. Over 16 million Americans currently suffer from smoking-caused illness and over 480,000 die each year from cigarette smoking and exposure to secondhand smoke. With the support of your Subcommittee, the FDA will be able to continue its work to reduce tobacco use and the health and economic toll it takes on our nation.

Sincerely,
